### Close Accounts

**Your account has been closed and scheduled for deletion.**

Stored e-mail and addresses are being scheduled to be permanently deleted, and inbound mail will be refused. Your .NET Passport will still function, and your MSN Hotmail e-mail name will be reserved.

To re-activate your account, simply go to <http://www.hotmail.com> and enter your Sign-In name and password. You will then be able to send and receive e-mail using MSN Hotmail once again.

If your account stays 'inactive' for over a period of days, it will be permanently deleted. This delay is necessary to discourage users from engaging in fraudulent activity. Additionally, due to the limited number of names available, we may allow other users to sign up for and use your current e-mail name after your account has been permanently deleted.
